

SAP Global Trading Services

Secure And Streamline Your Cross-Border Transactions

In an always expanding global market, multinational companies have the chance to optimize processes with international customs and trade compliance costs by **centralizing and automating cross-border trade activities** and operations.

To fulfil this goal, organizations must rely on the right **Global Trade Management (GTM) software** that should be fully integrated with company's overall IT infrastructure.

Emergys and SAP GTS will let your company **run worldwide compliance from a single platform** that integrates trade services across your entire enterprise, providing **transparency over shipments, orders, and payments**, ultimately **improving supply chain agility**, along with minimizing operational time and reducing distribution costs.
