

SAP Analytics Cloud

**CLOUD ANALYTICS**

During these unprecedented times, people are facing change from all directions. They need to **do more with less and make better decisions** more quickly.

SAP Analytics Cloud is a single experience for decision making that allows users to **discover, visualize, plan and predict, all in one place**. Giving everyone, whether in front of the customer or in the boardroom, the power to find new insights and take action.

**SAP® Analytics Cloud**

**SAP® Analytics Cloud**  
**One. Simple. Cloud.**

Leverage BI, augmented & predictive analytics, and enterprise planning in one multi-cloud solution that brings together all data with all the analytics capabilities needed so everyone can make fast, confident decisions.

**One Experience**

Ask, analyze, predict, plan, act and report in one experience.

**From Data To Intelligence**

Connect people and plans across the enterprise.

**For All Types Of Decisions**

Meet the diverse needs of all types of roles and decisions.

**Insight To Action**

Receive relevant insights embedded in your SAP cloud-based applications.

**Intelligent Enterprise**

Move from embedded-only to enterprise analytics for 360° insights across departments.

**Immediate Value**

Accelerate time to value with pre-built business content.

**Business Benefits**

Do more with less and **empower employees**.

Deliver best-in-class **customer experience**.

Invent **new business models** and revenue streams.

Never Start from Scratch Again, **A Faster Way to Find Answers**.

Understand What **Drives Your Business**.

Find Problems Before they Happen and **know how to stop them**.

**Plan based on data**, not on gut feel.

**For all industries**, all lines of business.

**Confident Decisions**
