EMERGYS

ELEVATE YOUR SAP ECOSYSTEM

WITH EMERGYS & BMC CONTROL-M

THE CHALLENGE

The Limits of Native SAP Scheduling

As organizations migrate to SAP S/4HANA and hybrid cloud environments, relying on native SAP scheduling tools like SM36 and SM37 is no longer sufficient. These tools create "automation silos" that cannot see or manage processes occurring in non-SAP systems or other instances. The result: manual interventions, cumbersome error handling, and a high risk of SLA breaches.

THE SOLUTION

Unified Workload Orchestration

Integrating BMC Control-M (or Helix Control-M) with your SAP environment transforms basic job scheduling into comprehensive, enterprise-wide workload orchestration. Control-M securely connects SAP systems-including ECC, S/4HANA, Business Warehouse (BW), and SAP Business Technology Platform (BTP)—with your broader IT landscape, ensuring faster delivery of critical business services.

KEY BENEFITS OF CONTROL-M FOR SAP

Single Pane of Glass Visibility:
Monitor, manage, and orchestrate all SAP and non-SAP workflows across on-premises, cloud, and hybrid environments from one centralized dashboard.

Robust Compliance and Auditability:
Keep operations in a validated state with tamper-proof, time-stamped audit trails that simplify regulatory compliance for SOX, FDA 21 CFR Part 11, and similar standards.

Event-Driven Automation:
Move beyond rigid, time-based schedules. Control-M triggers jobs dynamically based on real-time events-file arrivals, data readiness-so processes execute in the exact right sequence.

"Clean Core" and RISE with SAP Support:
Control-M is fully integration-ready for RISE with SAP and supports SAP BTP—automate side-by- side cloud extensions and third-party APIs while keeping your S/4HANA core clean.

Intelligent Job Interception:
Using the SAP-certified BC-XBP interface, Control-M intercepts jobs initiated by SAP users, places them on hold, and releases them based on enterprise-wide rules to prevent over utilization of critical SAP resources.

EMERGYS

WHY PARTNER WITH EMERGYS?

As a global digital transformation leader, Emergys provides the expertise needed to seamlessly unite your SAP and BMC investments.

Award-Winning Expertise

SAP Gold Partner. BMC Elite Provider. Multi-year BMC Partner of the Year and DBA Partner of the Year.

BMC Platform Health Checks

Comprehensive assessments of configuration, architecture, and security to remove bottlenecks and improve ITSM readiness.

End-to-End Services

SAP S/4HANA conversions, module implementation, and full-lifecycle BMC Control-M/ Helix Control-M deployment, customization, and managed services.

Proven Track Record

20+ years delivering digital transformation and supply chain visibility outcomes for enterprises worldwide.

READY TO ACCELERATE YOUR DIGITAL ENTERPRISE?

Don’t let fragmented processes hold back your SAP investment.

Contact Emergys today to schedule a complimentary tech assessment or a comprehensive BMC Platform Health Check and identify opportunities to optimize your workflow automation.
